HOW TO READ THE BADGES

LIVE = root fetched 200 at generation. NEW / NOW LIVE / PROMOTED = delta vs the 2026-06-30 edition. BY-DESIGN 404 = infrastructure with intentionally no root page. API RAIL = sold inside other products, never a standalone page. REDIRECT = 30x-forwards to its canonical home.

i

CATALOG RULES BAKED INTO THIS EDITION

Scheduling has exactly ONE link (calendar — booking 308-redirects there). Reputation Radar is call-priced, no public figure. Payments ships inside the assistant family and as API integration on builds, never standalone. The Concierge demo lives on the sales page. Video Gen is migrating to the Remotion stack post film-approval.

KEY TAKEAWAY

Every row below was alive at generation. Anything that failed its probe is EXCLUDED with a reason in the delta section — a dead link is never listed as live.

Source: Every URL fetched curl -4 (IPv4-forced, retry on transient failure) at generation time, 2026-07-12. Census carried from the verified offers Market Edition v3 appendix (2026-07-11 probe rounds).

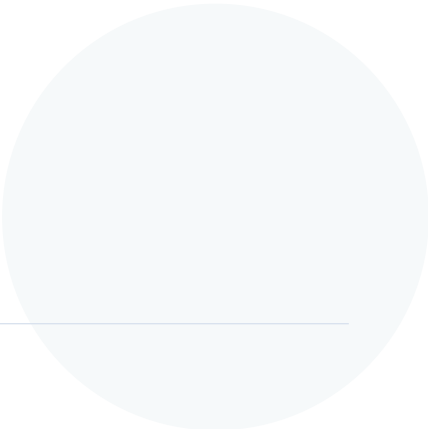

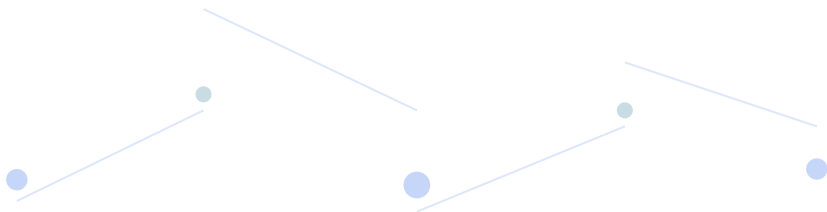

Service pages — where we take the client (every URL probed 200, 2026-07-12)

The buyable-offer surfaces. Every URL fetched live at generation, all answering 200. The Concierge demo lives on the sales page.

Source: 16 service pages, all fetched 200 on 2026-07-12 (curl -4, retry on transient failure). The sales page is ONE offer surface — Alex plus the Concierge demo live together at sales.chakrakali.com. Payments is NOT a standalone service — it ships inside the assistant family

(chat + payments + booking) and as API & payments integration on website builds. Reputation Radar and audit SKUs are call-priced — no public dollar figure, by design.

Landing pages — segment funnels (every URL probed 200, 2026-07-12)

Dedicated single-segment conversion funnels. Each is a standalone marketing surface that routes into the ONE scheduling link (calendar.chakrakali.com). They sell one offer to one audience — deliberately narrower than the service pages above.

Funnel	Our page	Probe + what it is
Code rescue	rescue.chakrakali.com	LIVE Rescue Your App — 72-hour root-cause diagnosis, fixed price quoted before work starts
Startups	startups.chakrakali.com	NEW startup MVP-build funnel; same segment surface, promoted into the catalog this edition
Automation	automation.chakrakali.com	NEW business-automation funnel; same segment surface, promoted into the catalog this edition

Source: 3 landing pages, all fetched 200 on 2026-07-12 (curl -4). All three ship from the chakra-segments surface; startups and automation are counted in the catalog for the first time in this edition.

i

FUNNEL RULE

A landing page never grows its own booking widget or pricing table — every funnel CTA routes to the canonical scheduling link (calendar.chakrakali.com) and the fixed-price-before-work promise. One booking flow, one source of truth.

Live sites, launching — real products on our own estate (every URL probed 200, 2026-07-12)

Live products and showcases we are launching — each one a real, working product running on our own estate. Every URL fetched live at generation, all answering 200.

Site	URL	Probe + what it is
Muhurta	muhurta.chakrakali.com	LIVE Vedic-timing consumer app
StudyMagic	study.chakrakali.com	LIVE AI study & retention — edtech
AI Games Academy	codegames.chakrakali.com	LIVE Build games/apps with AI
Isekai Engine	isekai-engine.chakrakali.com	LIVE Interactive story/game engine

Enterprise Intel	enterpriseintel.chakrakali.com	LIVE AI consultancy vertical

Source: 6 live sites launching, all fetched 200 on 2026-07-12. 25 live client-facing surfaces in total across the three tables. Workflow Master and Nexus sit in the service-pages table — they are services, not showcases.

Shelved this edition — withdrawn from launch (2026-07-12)

Still answering 200, but NOT for sale or feature — hostnames deliberately not hyperlinked. MindVault is NOT shelved: the brand now fronts the memory engine (see service pages); only the old standalone playground is deprecated.

Product	Route	Status
ClipHunter	clipper.chakrakali.com	SHELVED AI video-clip generator
Ark Commerce Rescue	ecommerce.chakrakali.com	SHELVED E-commerce vertical
Beacon Learning	learn.chakrakali.com	SHELVED Adaptive AI learning platform
Vaulted Financial	markets.chakrakali.com	SHELVED Trading & market intelligence

Source: Shelved 2026-07-12 by founder decision — excluded from all launch counts; do not feature.

Rails by design (API-only) + what came alive since June 30

Rails are infrastructure, not product pages — noted here so nobody puts them on a launch page. Hostnames deliberately NOT hyperlinked.

Rail	Route	Status by design
Payments rail	pay.chakrakali.com	API RAIL Stripe-backed; root serves a checkout shell (200) but payments is sold ONLY inside the assistant family and as API integration on builds
Concierge chat widget infra	chat.chakrakali.com	BY-DESIGN 404 embed-only widget origin for client sites; the demo lives on the sales page — sales.chakrakali.com
Booking rail	booking.chakrakali.com	REDIRECT 308 → calendar.chakrakali.com; canonical scheduling link is calendar only

Source: Rails probed 2026-07-12: pay 200 (shell), chat 404 (by design), booking 308 → calendar.

Source: Baseline: launch-catalog-verified-2026-06-30.pdf (38 routes: 26 LIVE, 2 AUTH-GATED, 10 not-servable). This edition: 25 surfaces, all 200; 7 shelved.

Delta vs June 30 — retired and excluded (why a route is not in this catalog)

Every route that was in the June 30 edition (or probed today) and is deliberately NOT listed above, with the reason. Nothing silently vanished.

Route	Status	Why it is out
scour.chakrakali.com	RETIRED	deprecated in favor of DeepLens (search.chakrakali.com); answers 200 but retired — do not link
legal.chakrakali.com	EXCLUDED	excluded per founder decision; root currently 502
chat.chakrakali.com	BY-DESIGN 404	embed-only widget origin — see rails
pay.chakrakali.com	API RAIL	payments is not a standalone product — see rails
booking.chakrakali.com	REDIRECT	308 → calendar — ONE scheduling link
detox / decks routes	EXCLUDED	404 — delisted
cockpit / netra-dashboard / proxy-dash	EXCLUDED	internal ops consoles — not client-facing
memory.chakrakali.com	REDIRECT	301 → mindvault.chakrakali.com — MindVault is the canonical home
June “OSS hero repos” section	EXCLUDED	dropped; nexus graduated into the catalog; old MindVault playground deprecated (brand now fronts the memory engine)

Source: All exclusions re-probed 2026-07-11. A failed probe is never listed as a live link.

THE LAUNCH SURFACE ITSELF

ark.chakrakali.com is live and is the page whose content these links feed. 25 verified-live surfaces are available to feature today — every one fetched 200 at generation; shelved routes are excluded from that count.
